## Sales activities for camouflage colors

## Camouflage Colour

- The RAL F9 is a collection of camouflage colours, used by Germany's and several other armed forces around the globe.
- Novatic is having all relevant cards and binding colour samples for colour matching and quality control and contain XYZ-values, the specification about the colour distance from the original standard and the reflectance curve is measured according to F9 Standard.
- Used IR Pigments are from certified suppliers like BASF.
- Every colour shade is produced under special quality marks.
- In the past years, several trucks, tanks and weapons were painted with novatic camouflage colours around the globe. On the following pages, you will find a short reference list and the current available colour shades.
- Please note, any new colour shade according to ASTM, Ghost or British Standard camouflage portfolio can be produced upon request!

## Camouflage Colour Range

### Produced Standard and special colours:

RAL 1039-F9 Sandbeige	1144-F9 Saudi Sandbeige (Land forces)
RAL 1040-F9 Earthbeige	1979-F9 Saudi Yellowbeige (Special forces)
