

TECHNICAL DATA SHEET

DESCRIPTION

Fine filler, easy to work, characterized by good forming properties in all required thicknesses. The adequate hardness of the sealer to the hardness of the paint and the smooth non-porous surface allow this product to be used as a filler and finish. Fill Multisoft Beige has been designed for use on fiberglass and steel reinforced plastics.

Manual; dry sanding. Easy to work even on homogeneous surfaces even when thick coats are applied. Filling the sealer does not fill the sandpaper. Deep imperfections are filled in a few layers.

SURFACES

Applicable on zinc-plated sheet, aluminium and its alloys, iron, steel, fibreglass, original paints or well consolidated old paints.
